

6 Natanara Beach, East Coast, Espiritu Santo, Vanuatu ,

Natanara - Naturally!

It was not so long ago that the Natanara development was a stretch of rainforest and coconuts that no-one knew about.

Now there are new homes springing up all along it and a brand new resort is due to open soon. Just 15 minutes from town and on the national grid more people are taking advantage of the affordability of this area.

We are delighted to be offering this block now as it has had a significant amount of development and preparation so you can move quickly towards the next step of building your tropical getaway. It also has the added advantage of a bore that has already been put in place to provide fresh water.

Cleared and fenced with a container lockup already on site you have a generous hectare of land. The clearing has been thoughtfully done leaving the beautiful hardwood trees as features for future generations.

There are 40 metres of ruggedly beautiful waterfront with pristine reefs providing endless snorkelling and diving opportunities.

At only \$150,000 this is possibly the best value block we can offer you at the moment. Jump on a jet (just 2 ½ hrs from Brisbane) and come and see for yourself.
